

Platinum 6000™

Low Air Loss Alternation/Immersion Therapy

Shown with Rev. 2 control unit
and navy top cover

Platinum 6000™ is ideal for facilities wanting automatic operations and effective microclimate management. Surface pressure is measured twice per second to maintain optimal patient immersion and envelopment. Preprogrammed comfort and therapy support settings are based on patient height and weight. Fits most bedframes.

- *Two therapy modes (alternation and immersion) for pressure injury prevention and treatment*
- *First Point of Contact™ top cover free of harmful chemicals*
- *Transport mode keeps mattress inflated without power*
- *Hillrom™ TotalCare® and VersaCare® replacements available*
