

Rotate™/Big Turn™

Low Air Loss Rotation Therapy

Rotate™

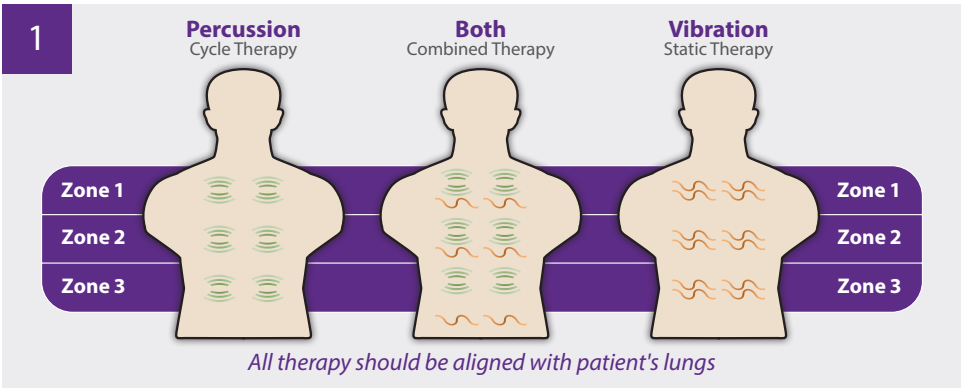

Big Turn™

Rotate™ and Big Turn™ provide Continuous Lateral Rotation Therapy (CLRT) in conjunction with low air loss for pressure injury prevention and treatment. Either support surface can be set to pulsation mode, providing active pressure redistribution by increasing and decreasing pressure over the entire body at preset cycle times. Blower delivers 1,740 liters of air per minute.

- Ideal for immobile patients: pulmonary and pressure injury prevention and treatment
- Rotation and pulsation therapy modes
- Optional respiratory therapy module for mechanical percussion/vibration
- Hill-Rom® TotalCare® replacement available (Rotate only)

Key Specs

MATTRESS

Capacity 600 lbs./1,000 lbs.
 Width 35", 39", or 48"
 Length 80"

CONTROL UNIT

Liters of Air Per Minute 1,740
 Continuous Lateral Rotation. 1-30 Min. Cycles
 Pulsating Low Air Loss 3, 5, or 10 Min.
 Alarms Power Failure and Low Pressure
 Unit Weight 16 lbs.
 Percussion/Vibration Therapy Optional

FABRIC OPTIONS

Nylon 70-Denier Polyurethane Coated ... Standard
 Polycarbonate 4-Way Stretch Top Cover ... Optional
 Non-Skid Polyurethane Bottom Cover ... Standard

- 1 — Percussion/vibration therapy module available
- 2 — Full-body continuous lateral rotation therapy and turn assist
- 3 — Blower provides 1,740 liters of air per minute for microclimate management
