

Sizewise® and LINET® Cross Manufacturing Agreement

In Feb. 2020, Sizewise® and LINET® announced a cross-manufacturing agreement between the two companies, leveraging the strengths of each to enhance their patient and caregiver offerings.

The agreement allows select LINET bed frames to be rented through Sizewise branches across the U.S., and brings Sizewise therapeutic support surface technology to LINET customers in the U.S. and worldwide.

The first two product pairings roll into Sizewise rental fleets this spring:

Sizewise Crosscare™ by LINET

This rental bed frame and support surface package leverages LINET Eleganza technology for an acuity adaptable bed that works well in both Med-Surg and ICU settings. Crosscare features a 15-degree lateral turn and Mobi-Lift®—two functions which simplify patient care and enhance SPHM.

Crosscare pairs clinically with numerous Sizewise support surfaces, including Alternate™, Immerse™, Platinum 6000™, Pulsate™, and Rotate™.

Sizewise Tom 2 by LINET

This rental crib offers innovative safety and care features, including unique telescoping side rails with five height positions plus a built-in scale and bed exit alarm. Tom 2's transparent head and foot ends give young patients a better view of their surroundings.

Tom 2 pairs clinically with Sizewise foam, gel, and air support surfaces—including Pediatric Pulse™.
