Envy Line® S Series™ stretcher pad system features F3 Free™ construction, which reduces harmful chemicals in the fabric, foam, and fire barrier. The pad contours to the patient’s body and provides low-interface pressure, aiding in pressure injury prevention. A high-density foam perimeter provides additional stability while enhancing comfort.

— F3 Free construction reduces harmful chemicals in the fabric, foam, and fire barrier
— Provides low-interface pressure and optimal contour
— High-density foam perimeter for additional stability
— Heel slope offloads pressure from the heels for extra comfort
