The Sapphire 800™ is a complete mattress replacement system that sets a new standard for the ultimate in pressure redistribution surfaces.

The Sapphire 800 features 20 individual high strength air cushions, which are enclosed in a durable containment system. For added patient protection these cushions rest on a 2” covered foam safety pad.

The 800 comes with a quilted top cover, which is waterproof, vapor permeable and completely machine washable. An exceptionally quiet control unit is user-friendly and attaches to the footboard of most hospital beds.

Rapid inflate/deflate is available with the optional Quick Inflator at the touch of a button.
