Victory 900™ features four layers of impression load deflection (ILD) foam, housed in a 1/2” viscoelastic memory-style foam for optimal patient comfort. The viscoelastic foot end is softer than the rest of the surface to protect vulnerable heels, and a concealed zipper prevents skin tears and protects inner foam.

— Pressure redistribution surface
— Heel area softer than rest of surface
— Optional RF-welded seams for max infection control
— Made-to-order item
