Pulsate™
Low Air Loss Pulsation Therapy

Pulsate™ stimulates the increase of capillary blood flow to the skin while using automatic pressure redistribution adjustments for optimal patient comfort. Static mode promotes proper envelopment for microclimate management. Fowler feature allows for increased airflow when head section is elevated. Blower provides 1,740 liters of air per minute.

— Pressure injury prevention and treatment
— Indicated for full-thickness burns as well as flaps and grafts
— Top cover is vapor-permeable, low-friction, and anti-shear
— Available in bariatric and non-bariatric sizes
— Hill-Rom® TotalCare® and VersaCare® replacements available
1. 1,740 liters of air per minute provides clinically effective low air loss

2. Air chambers gently pulsate between high and low

3. Pulsation mode stimulates the increase of capillary blood flow to the skin
